

STOCKINGER

BESPOKE SAFES

QUESTIONS CONCERNING CUSTOMIZATION OF A "STOCKINGER BESPOKE LINE" SAFE

We will gladly devote our time and attention to manufacturing your safe according to your precise wishes to safely and stylishly accommodate your watches, jewellery and documents.

All our safes carry the very high German rating VDS III according to the EU norm 1143/1.

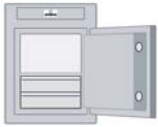

All our safes can be connected to the house alarm system. With every Stockinger safe you can send off a "silent alarm".

All Stockinger safes will have an internal light system with (not heating) white LEDs.

Our website www.stockinger.com provides further in-depth information on all Stockinger safes, details on finishes and interiors, materials and storage capabilities.

For a personal consulting service please call our manufacture on +49 - 89 - 7590 5828.

1. Please choose your Stockinger safe model:

Model CUBE
(Height: 67,5 cm, 26,5 inches)
(Weight: 300 kg, 661 lbs)

Model ISIS
(Height: 94 cm, 37 inches)
(Weight: 450 kg, 992 lbs)

Model CHIMERA
(Height: 127 cm, 50 inches)
(Weight: 750 kg, 1,653 lbs)

Model PHOENIX
(Height: 160 cm, 63 inches)
(Weight: 1,200 kg, 2,645 lbs)

2. Would you like a base (10 inches / 25 cm) below your safe CUBE or ISIS?

- Yes, with base
- No, without base

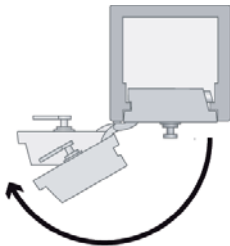

With base

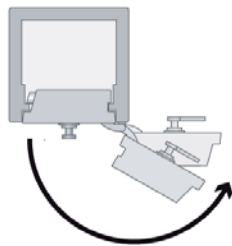

Without base

3. Right hand or left hand opening?

- Right hand (hinges located on the right side)
- Left hand (hinges located on the left side)

Left-hand
(hinges located on the left side)

Right-hand
(hinges located on the right side)

4. Which finish/laquer do you prefer for your safe?

Single-colored RAL-number: _____

5. Which finishing for your safe's interior and handle do you prefer?

- Stockinger Gold (The handle is solid brass, gold-plated)
- Stockinger Silver (The handle is solid chromed brass)

BESPOKE SAFES

6. Safe interior

The exact selection of the jewelry and watch trays as well as the amount and sizes of the drawers are the most important and intricate part in the configuration of your safe.

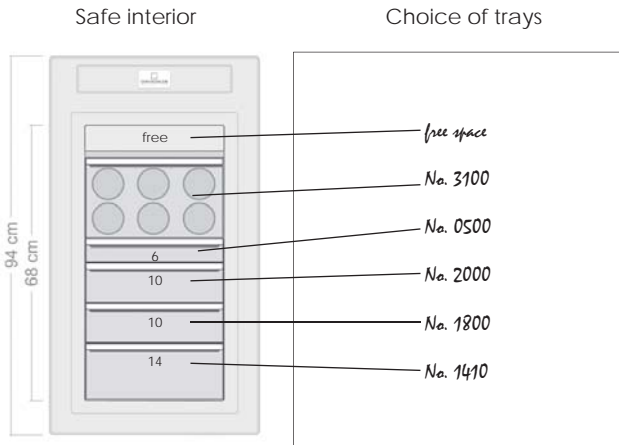

Please begin by selecting the specific trays for your jewelry and your watches. In order to gain an overview of all possible designs for the corresponding safemodel, we advise to print out the pdf-files „Jewelry and watch trays for models CUBE/ISIS“ or „Jewelry and watch trays for model CHIMERA“. Those can be found on our website www.stockinger.com under „Customization“.

The drawers available to you result from your selection of the trays, whereby one must adhere to the maximum usable interior height (in brackets) of the individual safe models CUBE (35 cm), ISIS (61 cm), CHIMERA (93 cm) and PHOENIX (127cm), which must not be exceeded.

For example, a safe model ISIS may hold one drawer of 140 mm, one of 100 mm and four drawers of 80 mm (total 56 cm).

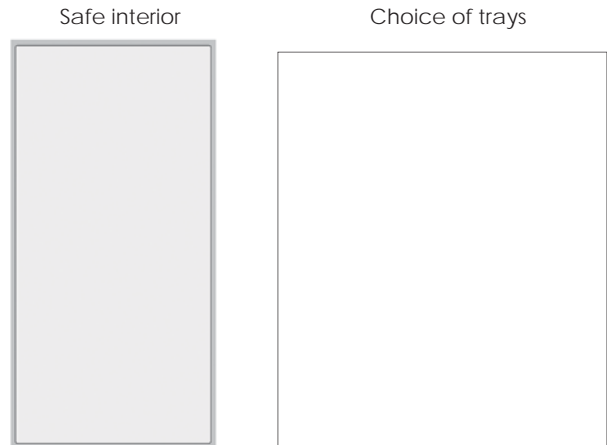

A chosen tray may always fit into a taller drawer, but never in a smaller one. Should you require further drawers without a tray, please indicate the amount of drawers below as well:

Example (Model ISIS):

Four drawers plus watch winder module

Your bespoke safe:

Please draw your desired interior and choose your preferred trays.

7. Material and color for the lining of the drawers and the trays? Please insert your preferred color below:

Stockinger Alcantara number: _____

8. Engraving:

If you would like your name or something else to be engraved on the nameplate which is located on the inside of the safe door, please write here the engraving:

9. Your contact details:

Name: _____

Address: _____

Phone: _____

e-mail: _____

Once you have completed all points on this list we can generate an offer and – if required – a photorealistic illustration of your safe. The subsequent production will require between six to ten weeks. Delivery can be effected worldwide.
