STOCKINGER *for* **BENTLEY**

LIMITED EDITION

 HANDCRAFTED IN GERMANY

TRADITION, VALUES AND CONTINUITY

People have always attempted to preserve objects of value. Over the course of history, the locksmith profession has become increasingly demanding. Today they are artists who combine both style and technical vision in their work.

At Stockinger, we are committed to this philosophy. We regard our craftsmanship as a gesture of appreciation to what is beautiful and valuable – and valuables should, of course, be secured as safely as possible.

STOCKINGER CRAFTSMANSHIP

Many people can build a safe but for us at Stockinger, our work really starts where theirs ends. Every safe has a security concept, which is the result of lengthy consideration coupled with experience and insight. Each safe combines a unique construction, special barrier materials, double boltwork and the patented Stocktronic keypad system. Stockinger safes meet the highest demands of German and International insurance companies and are entitled to carry the extremely high VDS security rating based on EN1143/1. Every single component as well as the finished product is subjected to stringent quality controls.

DESIGN AND FINISH

Every single Stockinger safe is a unique and bespoke masterpiece. The surface of each piece is carefully and conscientiously primed, painted and sanded during an 18-stage process of manufacture. This process takes several weeks and is completed with a finish of the finest carnauba wax, which produces a softer look with an unusual optical depth to the paint. The safe is available in all standard Bentley exterior paints, 10 Stockinger interior suedes and 3 wood veneer panels.

The Bentley handle itself weighs 3.5 kilograms and has been milled in a 16-hour process from a single block of brass. In 4 more refining steps, the grip has been sanded, polished, chromed and lacquered to provide the jewelled finish.

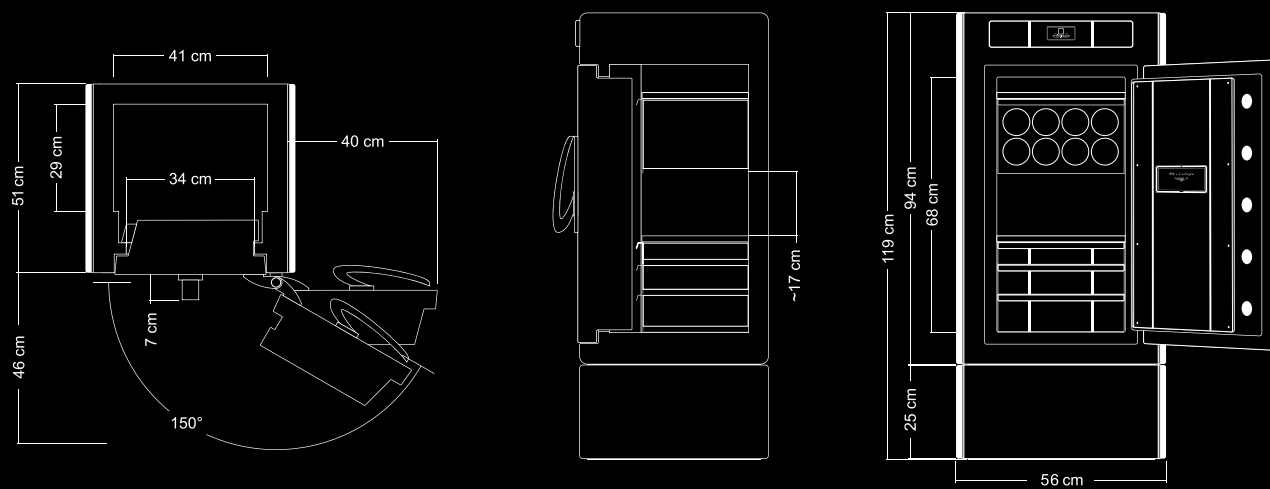

Complete with the Bentley "B" at the centre of the handle, the Stockinger "Arnage" provides the ideal, secure environment for your valuables.

TIMELESS INTERIOR

Stockinger stands for quality in material, design and manufacturing. The aesthetic appeal of our products is the result of our designers' careful consideration of shapes and materials. We use materials of the highest quality selected from the most reputable suppliers all over the world. Outstanding craftsmanship and passion for detail are critical factors in the elaborate manufacture of our safes.

For more than 20 years we have been integrating watch winder technology into safes. Watch collectors all over the world use our reliable devices. Our watch winders run almost noiselessly. An extremely long, disturbance- and maintenance-free life is guaranteed. The design captures traditional craftsmanship qualities and techniques and reveals the design cues that are our passion. The choice of materials demonstrates the high quality and finishing evident in every Stockinger safe.

FACTS & FIGURES

- Dimensions (H x W x D): 119 x 56 x 51 cm
47 x 22 x 20 inches

- Drawers: 3 in different sizes
- Finish options: All standard Bentley exterior paints, 10 suedes
- Wood veneer panels: Birds Eye Maple, Burr Walnut or Dark Stained Burr Walnut
- Limited edition: 200 safes

UNCOMPROMISING RELIABILITY

The patented Stocktronic locking system guarantees security with extraordinary ease of use. The unique operating drawer with a concealed keypad is opened by applying slight pressure to the square of the Stockinger logo. Our Stocktronic can also be connected to any alarm system and can be programmed to trigger a "silent alarm", so in threatening situations you are able to set off an emergency signal simply by opening your safe in the normal way.

Stockinger safes have a multi-wall safe construction, which allows the lightest possible weight combined with a maximum security level. The bolt mechanism locks the safe on all four sides. Large pin locks provide additional protection against break-ins, and for aesthetic reasons are always chrome-plated. All Stockinger safes have an emergency bolt mechanism, which permanently bolts the safe if an attempt is made to open it by force.

All our safes are subject to a tight quality control procedure. This quality control and our strict guidelines for production ensure high standards of reliability.

STOCKINGER FOR BENTLEY – ARNAGE

Dedicated to design, engineering and craftsmanship. Created in honour of the Bentley vision. The new "Stockinger for Bentley – Arnage" exhibits sleek luxury in design and polished perfection in technology. Like its famous namesake, it combines secure technology with designer looks. The "Arnage" will be limited to 200 safes.

As a Bentley is unmistakable, so too is a Stockinger safe. Hallmarks of luxury such as the leather linings and the brushed aluminium interior finish combine with the seven layer lacquer and design elements typical of Bentley interiors to create its exciting beauty. For devotees of fine mechanisms, the "Arnage" is an elaborate watch safe equipped with state-of-the-art watch winders for exceptional timepieces.

The greatest luxury in life is time. Savour every second.
